Summary

I'm Nikki Shukla, a passionate web developer focused on backend and full-stack development. I work with Node.js, Express, MongoDB, and JavaScript to build clean and functional applications. I enjoy learning by building projects, solving problems, and deploying apps to the cloud. Currently, I'm improving my skills in system design, APIs, and scalable backend development

Education

Lokmanya Tilak College of Engineering - Affiliated to University of Mumbai Bachelor of Engineering in Computer Engineering	June 2022 - June 2026
IDEAL College of Arts, Science and Commerce (Autonomous), Mumbai. 12 th Science- PCM, Computer Science	June 2020 - June 2022 Percentage: 80%

Skills

- **Technologies:** HTML, CSS, Tailwind CSS, JavaScript, SQL (basic), MongoDB
- **Frameworks & Libraries:** React, Next.js, Node.js, Express.js
- **Tools & Languages:** JavaScript, Java, Python (basic), Git, GitHub, Visual Studio Code
- **Soft Skills:** Team collaboration, problem-solving, adaptability, communication, time management, self-learning

Projects

Chat Application (GitHub Live Project)	April 2025
• Developed a backend-focused chat application using Node.js, Express.js, and MongoDB, enabling user-to-user messaging with persistent data storage. • Designed MongoDB schemas with Mongoose and timestamps to maintain ordered conversation history and efficient data retrieval. • Implemented RESTful APIs to fetch all chats and user-wise conversations with optimized queries. • Deployed the application on Render with MongoDB Atlas, configuring environment variables and production-ready database connections.	
BookMyStay – Travel Accommodation Platform Full-Stack Web Application (GitHub Live Project)	Dec 2025
• Designed and developed a full-stack backend using Node.js, Express, MongoDB, and EJS, implementing RESTful APIs for listings and reviews with complete CRUD functionality. • Implemented server-side validation using Joi and centralized error handling to ensure data integrity and prevent invalid or malicious requests. • Built a scalable data model using Mongoose referencing and population to manage one-to-many relationships between listings and reviews efficiently. • Refactored application architecture using Express Router and middleware-based design, improving code maintainability and scalability. • Deployed the application on Render with MongoDB Atlas, configuring environment variables and production-ready server setup.	
Portfolio Website (Personal Project) (GitHub Live Project)	
• Designed and developed a personal portfolio website using HTML, CSS, and JavaScript to showcase projects, skills, and contact information. • Deployed the website using GitHub Pages, ensuring responsive design and cross-browser compatibility.	

Work Experience

Web Development Intern Main Flow Services and Technologies Pvt. Ltd. (Link)	June 2025- July 2025
• Designed and implemented a secure login and signup system to strengthen platform security. • Engineered a responsive portfolio website, boosting client engagement by 45% and reducing bounce rates by 25%. • Acquired hands-on experience with frontend technologies including HTML, CSS, JavaScript, and backend integrations. • Led the development team during weekly sprint reviews, coordinated task distribution, and ensured on-time delivery of key modules, resulting in a 20% increase in development efficiency.	

Achievements & Certifications

- **IBM SkillsBuild – Web Development Fundamentals**
- **Web Development – Udemy**
- **GeeksforGeeks – AWS Certified Cloud Practitioner (Training)**
- **Published a research paper on automated image-text meme generation using Convolutional Neural Networks (CNN)** ([FDRP Journal](#))
